COLLATERAL TRACKER

Overview

An android-based app for field agents and assessors to report findings from the location. The data is transmitted to a server where it is segregated by each collateral. Enables independent audit of assessor findings when needed, facilitates transparency and accountability

Features

- Send pictures, notes, audio clips by 2G/3G
- GPS tagging
- Secured by a PIN
- Access control to list of projects for each user

Benefits

- Could be used to record progress of Secured Loans such as Home Loans, that have multiple disbursements and require periodic assessment
- Track data by most granular unit of each project – building, plot, factory unit etc
- Ensures authenticity of time and location
- Generate drill-down reports
- Easy retrieval of records
- Facilitates evidence for audits, prevents fraud

ENTERPRISE CONTACTS

An Android app to provide instant access to all contacts in an enterprise or in a group, as controlled. When installed and synced with server, all contacts in that user's group will get downloaded.

The app is secure and authenticated at the time of installation through a combination of OTP, phone number and handset configured for that user by the Admin.

Data is **safe and secure** – it is encrypted before storing on the server

Features

- One-touch Sync of Contacts
- Data privacy – data is encrypted
- Send email or SMS to entire Group
- Access controlled and limited to groups that a Licensed User is part of
- Secure installation, prevents access by external individuals

Benefits

- Immediate access to all Contacts of an Enterprise, as soon as a User installs the App
- No more saving each contact individually on phone !
- Easy administration, keep the list accurate at all times
- Easy to install, and use

CONSTRUCTION ASSISTANT

Overview

An android-based app for field supervisors to report progress, supported by reports for the management

- Send photos, audio clips, notes, progress reports from the construction site
- **Raise emergency alarms** – in case of accidents, theft, complaints, material shortage etc
- GPS tagging of data, so the data sent from the app can be checked to see if the person sent it from expected location
- Published pictures of construction progress, the pictures selected by the management will be made available to customers
- **Payment details** by each customer – payments made so far, payments due and payments overdue

Features

- Categorized collection of data for each project
- GPS tagged data
- Emergency alarms as calls and SMS
- Published pictures of progress
- Payment Details of Customers

Benefits

- Easy view of all data for each project, by each stage
- Remote monitoring
- Accurate reporting through GPS tag
- Instant alert during emergency
- Higher customer satisfaction
- Easy tracking of customer payment status and overdues

REAL ESTATE SALES TRACKER

Overview

An android-based app to record and track the status of sales of a real estate project

Features

- Summary table showing the breakup for each Site block
- Visual colour-coded view of sales status
- Add basic payment details for a site
- Reports
 - All unsold sites
 - Sites where booking is lapsing soon
 - Sites which are only booked
 - Sites with payments complete and ready for registration

Benefits

- Easy to get status with colour code
- Can be accessed from anywhere
- Easy to update, keep the data accurate at all times
- Can be used for **multiple projects**
